Diar Selimi
Software Developer

3+ years of experience working as a Software Developer, and I have worked on large projects for the Swiss Market.
- I love to learn new job-related skills and try new technologies that I think they work better.
- I love the quality and elegance, and that's what keeps me testing and proving my work.
- I love to work with a team that is always up to date with the tools they work and learn every day new things.

When thinking of Diar, the word "extraordinary" comes to mind. I have never met a more committed developer with such high standards of quality and the ability to follow them in even the smallest tasks.
